Scholarships

BAU provides various scholarships for students based on different features. There are Centre for Assessment, Selection and Placement scholarships, international diploma scholarships, ApplyBAU scholarships, sibling discounts, sports scholarship, vertical transfer scholarships, lateral transfer scholarships, graduation success scholarships, and alumni association scholarships.

BAU provides financial support for more than 15,000 students to reach quality education through discounts in tuition fees and full scholarships. This financial support amount corresponds to 464,320,353 TL.

Low-income student support

BAU provides facilities and programs to support low-income students completing their study at the university in the form of food support.

There is also transportation support for students. There is a sea shuttle serving between two different campuses of the university. Also, there is a bus shuttle serving for a different campus of the university.

Opportunities for international students

BAU is dedicated to supporting students from all over the world in accessing quality education. Bahçeşehir University currently offers two types of tuition fee scholarships:

Success Scholarship: This scholarship is awarded to a student at the end of their second year, if they rank the first or second in their department, on a list published by the university. If they are placed the first in their department, they receive a 100% scholarship. If they are ranked second, they are awarded a 50% scholarship.

Faculty Scholarship: These scholarships are offered to those registered to the following faculties: Health Sciences, and Educational Sciences. Students who apply to these faculties can get a scholarship of 30%. Additionally, if the students have any projects or personal abilities that can contribute to the university, they can apply to the scholarship committee with an intention letter.

Policy and support addressing life-long learning

Bahçeşehir University Continuing Education Center (BAUSEM) values the competitive job market and is aware that lifelong learning is a fundamental requirement for sustainable development, along with formal education in recognizing and developing talents. Accordingly, BAUSEM ensures that lifelong learning services and activities are carried out and supported appropriately. BAUSEM provides students, graduates, public and/or private sector employees, and all other community members with short and/or short-term learning opportunities, or organizes long-term training programs, conferences and seminars. BAUSEM provides every individual with access to learning in parallel with its societal service function and gives everyone equal opportunity to receive training based on his / her preference of duration. BAU does not discriminate in favor of race, ethnicity, national affiliation, class, religion, language, political opinion, gender, sexual orientation, age, health status and other conditions.

BAU provides certificate programs offered at BAUSEM that are designed to support basic education for everyone. The number of certificates given:

2020-2021 academic year: 679 deed of adherence, 1261 certificates

2021-2022 academic year: 414 deed of adherence, 1257 certificates

2022-2023 academic year: 423 deed of adherence, 1342 certificates

Local community support

BAU organizes business incubation program for selected start-ups. BAU Hub provides one-to-one mentorship from experts in the field, intellectual and industrial property rights support in cooperation with BAUTTO, prototyping area and laboratory facilities, academic and technical consultancy support, shared office opportunity at BAU Hub Incubation Center, consumables, company establishment and legal/annual consultancy support.

In 2022, BAU has assisted several start-ups from various industrial sectors, including tourism, IT, advanced material engineering, advanced food science and technology, education technology platform, and financial technology.

BAU Hub (Incubation Center) entrepreneurship programs have been designed to serve technology and innovative-based entrepreneurs with a full focus on local, national, and international community impact. Especially, two vertical program in which both incubation and acceleration services included, digital game design and education technologies come forward. Bug Lab TEKMER gives priority to combating the climate crisis and quality education in the serious games category. Hub's Edulab program seeks quality education solutions not only for k12 or higher education segment but also for lifelong learning and vocational education. This thematic prioritization will bear fruit in the coming years. Along with free-of-charge training, the local and regional community also benefits from BAU's entrepreneurship-focused funded projects through dissemination activities.

BAU organizes many activities to raise awareness about the issue and to find possible solutions in order to serve end hunger, achieve food security and improved nutrition and promote sustainable agriculture, which are among the goals of sustainable development. Bringing together different national and international stakeholder groups and ensuring that opinions are shared in order to solve the hunger problem in the world is an important priority for Bau.

• “Period Poverty” Seminar (26 November 2021)

The conference was held in a hybrid fashion. The subject of menstruation continues to be a taboo in societies which creates challenges such as menstruating people’s poor access to information and products such as hygiene pads and tampons. Poverty can limit women’s and girls’ access to culturally appropriate, high quality menstrual supplies. Seasonal agricultural workers, refugees and socioeconomically poor individuals experience such barriers more than the others and face negative health consequences. The conference emphasized already mentioned topics and examined menstruation within the context of human rights and law.

Kulakkaya Green Growth and Sustainable Development Summit (18 February 2022)

Academics, politicians, public and private sector representatives came together at the Kulakkaya Green Growth and Sustainable Development Summit and discussed the green growth model, the sustainable development goals and national harmonization strategies for the efficient use of natural resources and minimizing pollution.

“Save Your Food” Event by the BAU Gastronomy and Culinary Arts (2022)

BAU Department of Gastronomy and Culinary Arts in collaboration with the Beşiktaş District Directorate of Agriculture organized an awareness and skill development activity called “Save Your Food”. The event aimed to create awareness among female mukhtars at the Beşiktaş district regarding different practices of reusing food leftovers and reduce food waste. The activity was also designed to motivate them to share their newly acquired knowledge among their communities.

Local Products, Gastronomy and Cooperatives' Workshop from FAO and BAU 11.09.2021

The Food and Agriculture Organization of the United Nations (FAO) and Bahçeşehir University (BAU) organized a workshop on the role of young people and women in agriculture and cooperatives with the theme of 'Local Products, Gastronomy and Cooperatives'. The two-day workshop aims to include local agricultural products in the development of the country with maximum benefit, contribute to sustainable development, and deliver innovation and innovation in agriculture to family businesses.

In cooperation with the United Nations Food and Agriculture Organization (FAO) and Bahçeşehir University (BAU), a workshop was organized with the theme of 'Local Products, Gastronomy and Cooperatives' in Şeyhli District of Giresun's Piraziz district. AK Party Giresun Deputies Kadir Aydın and Cemal Öztürk, Giresun Governor Enver Ünlü, Ordu Governor Tuncay Sonel, Giresun Mayor Aytekin Şenlikoğlu, UN Advisory Board Member Enver Yücel, FAO Central Asia Sub-Regional Coordinator and Turkey Representative Viorel Gutu, United Nations Turkey Resident Coordinator Alvaro Rodriguez, members of the protocol, women's cooperatives and many guests attended.

At the event, local agricultural products will be included in the country's development with maximum benefit, contributing to sustainable development, innovation and innovation in agriculture will be delivered to family businesses, and women and young people will be informed about cooperative formation, smart agriculture practices, digital agriculture and sustainable food systems-related technologies will be actively involved in the processes. is intended to be included.

'WE WANT TO REVEAL THE ENDEMIC PLANTS OF THE BLACK SEA'

Making a statement about the workshop, UN Advisory Board Member Enver Yücel said that they started a study to reveal the endemic plants of the Black Sea.

Stating that they want to open the products grown in the region to the international arena, Yücel said, "We are establishing an area in Piraziz together with Bahçeşehir University and the United Nations Agricultural Organization. This area is a center for implementing smart agriculture that can shape the agriculture of the future. We want to reveal the endemic plants of the Black Sea, to taste the local dishes related to them, and to open the gastronomy of this region to the international arena. I think we will have achieved our goal if we can provide studies and training to our people on this subject. I hope that these studies will play important roles, especially in the employment of women. We will provide training here. We will have application areas and we will give examples to the participants on how their hand-made products can reach international markets. "Our aim is to show how the valuable plants growing in these lands can be used in agriculture and medicine in the application area of our university," he said.
