

Bahçeşehir University
Faculty of Engineering and Natural Sciences

Dear HR Officer,

As the Mechatronics Engineering Department at Bahçeşehir University, our aim is to provide a high-quality engineering education for our students and provide them with the skills necessary to address the needs of the industry. For this purpose, our students are required to complete two separate internships with at least 20 working days each.

If you provide internship positions for our students in your company; you will not only support engineering education in Turkey, but you will also get to know and assess a candidate engineer, maybe your future employee. In addition, your evaluation of our students and feedback will help us improve our undergraduate program.

You can e-mail us about the number of open internship positions at your institution or about your decision to employ (as an intern) the student who delivered this letter to you. You can direct all your internship related correspondence to Sinan YİĞİT (sinan.yigit@bau.edu.tr). You can also access more information about summer training at Mechatronics Engineering Department from the web site at <https://bau.edu.tr/content/13242-intership>.

We thank you in advance for your time.

Yours sincerely,

Dr. Yalçın ÇEKİÇ
Associate Professor, Department Head
Mechatronics Engineering Department
Bahçeşehir University
